

Our most  
***advanced***  
***zappi*** yet

# Same look, **endless new opportunities**

We've recently announced another huge leap forward for our zappi product line-up.

A lot has changed since we launched the original zappi and we're thrilled to see companies big and small take on the challenge to make the world a better place.

We've recently announced that zappi is now OCPP 1.6J compatible. For the first time, you can pair our leading green charging experience with charge point management platforms, fleet management systems, and much more.

That's not all. We're also announcing myenergi ID, our new way to manage access to your zappi and personalise the way you charge.

So, how do you get our most advanced zappi yet? If you're an existing zappi with built in Wi-Fi (v2.1) customer, it's as simple as installing the latest software update via the myenergi app.

We can't wait to see what our customers and partners achieve with these new features.

# zappi has new friends *with ocpp*

## New Opportunities

Whether you're looking to take payments from your Bed and Breakfast guests for EV charging, automate the invoicing and reimbursement of charging costs or manage employee's access to your workplace's charging station, Open Charge Point Protocol (OCPP) now allows you to pair your zappi with a platform of your choice, creating your own bespoke charging package.

OCPP has been developed based on the demands of our customers and partners, and we've intergrated with a number of leading platforms to help you get started.

You can find out what OCPP messaging we currently support [here](#), and we will update this page as changes to our service our made.

## OCPP without the compromise

We've designed our OCPP service so that you can still use the myenergi app and ecosystem, even if you choose to pair zappi with a third party platform. This means you still get the full benefits of the myenergi ecosystem, allowing you to maximise energy from renewable sources with the help of eddi and libbi.

# myenergi ID your key to a personalised experience

If you're not quite ready for a third-party OCPP platform, zappi now comes with myenergi ID. With myenergi ID, you can control who has access to each of your zappi charging stations by grouping user profiles and creating access groups. With access groups, you can restrict access to particular user groups with a simple 5-digit PIN code.

myenergi ID goes further than traditional access methods. It allows you to personalise your individual experience, by choosing which charging mode your zappi defaults to when you plug in, for example. Additionally, you can also tell us if you're charging for personal or business usage, and we'll keep track.

Another new feature that comes as standard is the enhanced reporting package. You can now get all of this information at your fingertips, through your myenergi myaccount..

## PIN code management

Create up to 126 unique users, with PIN code unlock. No RFID cards required, for a simple experience.

## Enhanced access control

Create up to 5 additional access groups, to control which profiles have access to which zappis.

## User profiles

Personalised charge profiles for zappi allowing custom charging modes and enhanced reporting.

# Ready to help *decarbonise your fleet*

Thanks to myenergi ID and OCPP, zappi now allows businesses to electrify their fleets, whilst ensuring they are charging their vehicles as cheaply and greenly as possible.

Combining our market leading solar charging and off peak charging scheduler, you can ensure that your fleet charges at the most cost effective times and when green generation is available, ensuring your fleet is as green as possible.

For smaller businesses there is myenergi ID, with myenergi ID there are no RFID cards to buy or manage, simply issue your employees with 5 digit PIN codes for a truly low cost solution.

You can manage even more users when you pair with an OCPP platform. You can even pair with your favorite OCPP compatible fleet management platform.

## Enhanced reporting

See who charged, when and how much, straight from your myaccount portal.

## Enhanced access control

Any business usage is automatically marked based on the PIN profile you use, it's also easy to change this retrospectively, straight from the my account portal

## Filters and export

Filter by user profile, business usage, and time period. When your ready, it's easy to export your report to a CSV file.

# A product that *keeps getting smarter*

When choosing a charger, you want to make sure it is ready for what comes tomorrow. Your zappi gets smarter with time, making sure you're safe, secure and ready for what comes next.

We offer all zappi customers over the air updates, where possible we even provide new features to existing customers too. That's why all our zappi customers, with built in WI-FI, are getting these new features as a simple firmware update, simply press install in the myenergi app and we'll do the rest.

When you purchase a zappi you can be confident that it's packed full of innovations, that make it ready for the future.
